

	Liquid ‘Special O’
Description	<ul style="list-style-type: none"> Boeson Trennwax® Liquid ‘Special O’ is an anhydrous (water free) clear light yellow oil at room temperature. At a temperature of 16/18°C it will start to cloud and lose its clarity – this does <u>not</u> affect the performance of the product.
Usage	<ul style="list-style-type: none"> A liquid release agent for cooling belts, cooling tables, batch rollers and other machinery in candy, toffee, caramel and tablet production.
Processing	<ul style="list-style-type: none"> Hand applied by cloth, brush. By spraying equipment. By dripping device.
Application Temperature	<ul style="list-style-type: none"> 20 to 30°C. Must be applied <u>very</u> sparingly – an extremely fine/thin film of release agent is all that is required.
Storage Conditions	<ul style="list-style-type: none"> 20 – 25°C – cool, dry hygienic conditions ((if stored at low temperatures for an extended length of time, the liquid may show signs of solidifying as the oil in the product starts to crystallise. This can be reversed by gently warming the Boeson Trennwax. Its performance will not be affected).
Iodine Value (By calculation from Gaschromatogram)	<ul style="list-style-type: none"> 38-57.
Peroxide Value (By the Wheeler method)	<ul style="list-style-type: none"> Less than 3.
Viscosity	<ul style="list-style-type: none"> Approximately 39 mPas (milliPascalseconds) at 25°C.
Pack Sizes/Types	<ul style="list-style-type: none"> 8kg tin and 170kg drum.
